30th March 2021

MENA ports are less efficient than Norther Range Ports but they are improving...

LSCI Comparison Northern Range, North Med and MENA&Turkey

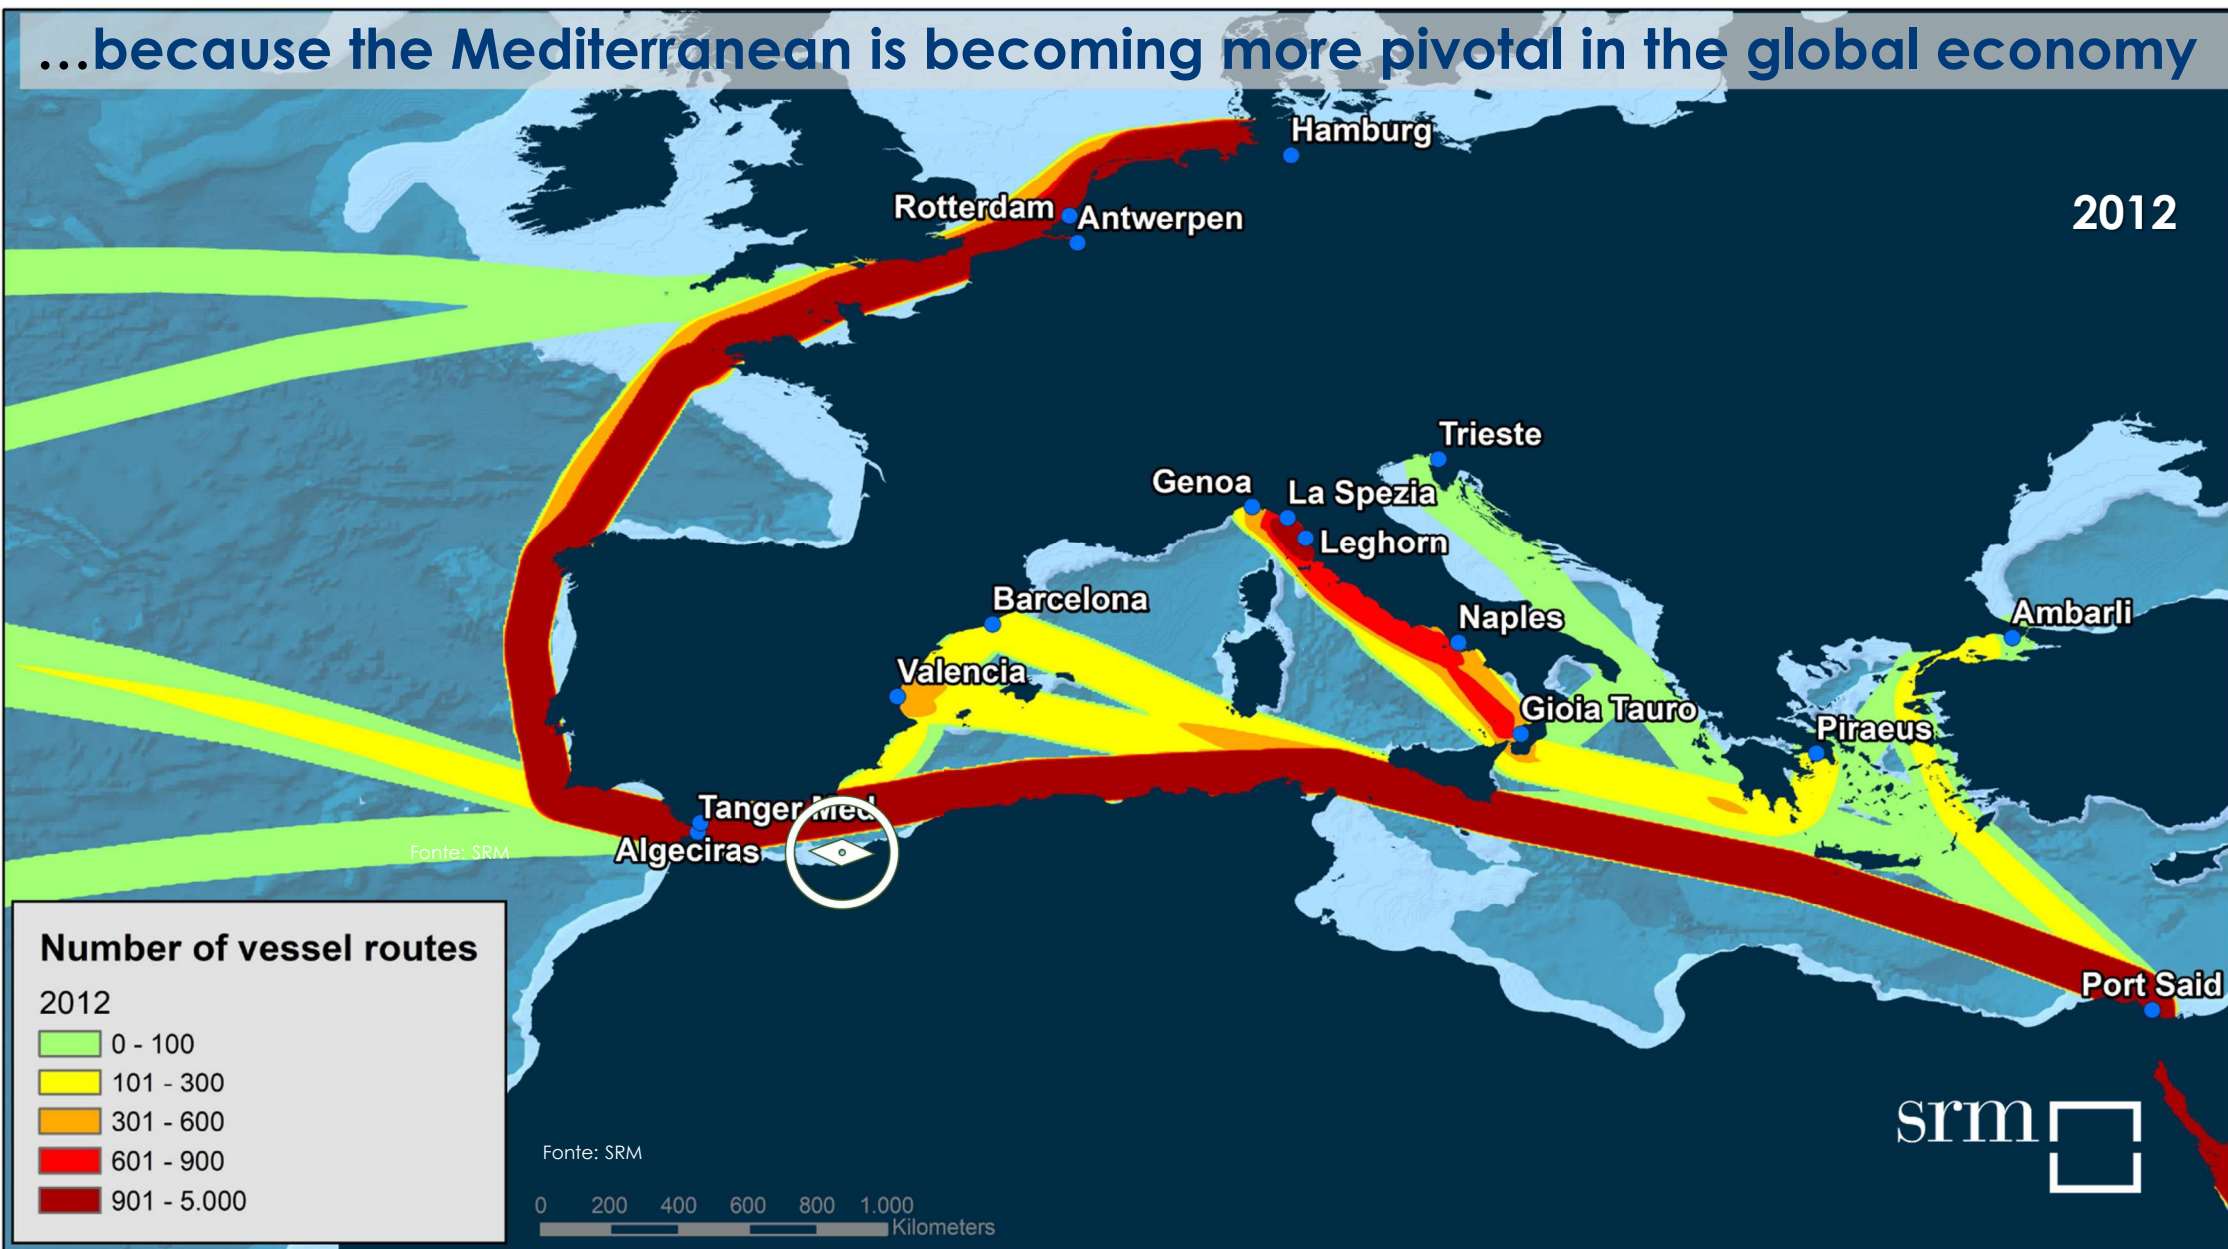

90% of world trade is carried out by maritime mode.

Efficiency of ports and logistics **is essential** not only for export and general economy but also **for efficiency inside supply chains and** for enhancing **economies of scale...**

... because we know **that transport costs are a key part of global industries costs.**
